

Kasco® Aeration

Affordable • Dependable • Efficient

Used for:

RACEWAYS and PONDS: Increase fish density and feeding rate.

TANKS: Maintain densities of up to .5 pounds of fish/gallon of H₂O. Vent CO₂.

EMERGENCY AERATION: 3.0 lbs/O₂/hp/hr.
One person can move aerators from pond to pond.

"We've been using Kasco for years and they are very reliable. In fact, we do not have to measure dissolved oxygen levels in the ponds with Kasco Aerators."

Mike Clark – Farm Manager for Keo Fish Farms, the largest producer of hybrid Striped Bass fingerlings in the world.

"Kasco Aerators are THEE most effective aerator out there. Not only do they aerate effectively, they also degas carbon dioxide. We have some units that have been operating for 10 years without any work done to them at all!"

Steve Abernathy – Owner of Til-Tech Aquafarm, which produces Tilapia fingerlings in an indoor recirculating facility.

"I use and sell Kasco Aerators because they have always been dependable and have served us well in our small ponds."

Paul Williams – Owner of Owen and Williams Fish Farm, producers of game fish, grass carp, and catfish.

"We have a bunch of Kasco units and find them to be efficient, dependable, and portable. They are a good choice for our farm!"

Peter Fritsch – Farm Manager for Rushing Water Trout Farm, the largest Rainbow Trout producer in the Midwest.
